PHILOSOPHICAL MAGAZINE B, 1994, VOL. 69, NO. 6, 1217–1224

SUBJECT INDEX

Vol. 69

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
AlCoCu decagonal phase, structure of	707 B
AlCoNi quasicrystal, dislocations in	123 L
AlCuFe quasicrystal, deformation twinning in	115 L
AlCuFe quasicrystal, irradiated, defects in	15 L
AlCuFe quasicrystals, dislocations in	305 L
AlCuLi quasicrystal, cluster model for	85 L
AlFe alloys, phases in	45 A
AlFe, quasicrystal decomposition of	205 L
Alkali metals, soft-X-ray threshold of	993 B
AlLi, $L1_2$ precipitates in	591 A
Alloys, random, atomic displacements in	269 L
AlMgLi alloys, icosahedral phase in	343 L
AlMn, decagonal phase in	671 B
AlN ceramics, grain boundaries in	525 B
AlNiCo quasicrystal, order–disorder in	227 L
AlNiFe, quasicrystalline phase formation of	141 L
AlPdMn quasicrystal, dislocation loop in	291 L
Amorphous GeC, hydrogenated	1 B
Amorphous Si, structural changes in	177 B
Amorphous Si transistor, electron states in	223 B
Amorphous SiMo, current fluctuations in	333 L
Anisotropic half-space, dislocations in	65 A
Antiphase coarsening, transients in	247 L
Aperture effect on Compton line profiles	113 B
As chalcogenides, photostructural changes in	21 B
Atomic displacements and correlation factors	57 A
Atomic dynamics in confined liquids	989 B
AuCu, spinodal ordering in	925 A
$Au_{11}In_3$, domain configuration in	211 L
Band edge mobility in Si:H	253 B
BaO/MgO interface, defect formation at	787 A
$BaTiO_3$ ceramics, nucleation of twins in	1051 A
B doped Si multilayers	255 A
Bimaterial wedge, r^{-n} singular fields at	223 L
Binary alloys, microstructure of	83 B
BiTe chalcogenides, point defects in	31 B
Blocked deformation twin, shape of	171 L
Bond order potentials for shear constants	889 B
Brass, deformed, dislocations in	1155 A
Calcium fluoride, fluorine formation in	285 L
C, amorphous, properties of	1121, 1133 B
Carbon filaments, fractal, on insulators	45 L
Cathodoluminescence of GaAs	553 B
Cellular patterns, correlations in	397 B
Charge transport in disordered systems	39 B

PAGE

Chemisorption at surfaces . . . . . 931 B
Cluster model for AlCuLi quasicrystal . . . . . 85 L
Clusters, gold, spontaneous alloying in . . . . . 279 L
Clusters, metallic, structure of . . . . . 1045 B
Clusters of Pd on MgO, structure of . . . . . 1073 A
Co–Gd, magnetic amorphous . . . . . 47 B
Collinear interstitialcy mechanism . . . . . 57 A
Compression twins in Zr . . . . . 189 L
Compton line profiles, aperture effect on . . . . . 113 B
Confined liquids, atomic dynamics in . . . . . 989 B
Correlated percolation in solid solutions . . . . . 95 B
Correlation, electron, fifth-order components . . . . . 1011 B
Coulomb interaction in an electron gas . . . . . 77 L
Coulson contour . . . . . 799 B
Cr_3Si, Nb_3Al and V_3Si, forbidden reflections in . . . . . 23 L
Cracking, theory of . . . . . 33 A
Cracking of ice . . . . . 9 L
Creep equations for vacancy diffusion . . . . . 37 L
Critical field anisotropy in UPt_3 . . . . . 319 L
Critical stress in Peierls–Nabarro model . . . . . 171 L
CrSiV films, metal–semiconductor transition in . . . . . 237 B
Crystallization of Si:H . . . . . 509 B
Crystals in liquids, nucleation of . . . . . 261 L
CuAg, liquid, resistivity of . . . . . 1075 B
Cu_3Au, vacancies in . . . . . 11 A
CuMnAl, spinodal wave in . . . . . 349 A
Current fluctuations in a-Si:H/Mo . . . . . 333 L
CuW, strain deformation in . . . . . 645 A

Damping, mechanical, in metals and polymers . . . . . 1111 B
Dangling bond defects in Si:H . . . . . 263 B
Dangling bonds in amorphous silicon . . . . . 57 B
D defects and strain fields in silicon . . . . . 1179 A
D dimensions, expansions in . . . . . 787 B
Decagonal AlCoCu, structure of . . . . . 707 B
Decagonal phase in AlMn . . . . . 671 B
Deep trapping and recombination in Si:H . . . . . 147 B
Defect centres in diamond . . . . . 1141, 1149 B
Defect formation at the BaO/MgO interface . . . . . 787 A
Defects and hydrogen in SiN . . . . . 307 B
Defects in an irradiated AlCuFe quasicrystal . . . . . 15 L
Defects in hydrogen implanted silicon . . . . . 881 A
Defects in irradiated SiC . . . . . 237 A
Deformation and stacking faults in InP . . . . . 903 A
Deformation and structure of TiAl . . . . . 527 A
Deformation at high *T* in TiAl . . . . . 689 A
Deformation of $D0_{19}$ compounds . . . . . 1161 A
Deformation of semiconductors . . . . . 793 A
Deformation model for twin intersection . . . . . 111 L
Deformation twin, blocked, shape of . . . . . 171 L
Deformation twinning in AlCuFe quasicrystal . . . . . 115 L
Density functions and functionals . . . . 727, 737, 745, 763, 771, 779, 807, 883 B
Diamond, defect centres in . . . . . 1141, 1149 B
Diamond polishing mechanisms . . . . . 621 B
Diamonds, voidites in . . . . . 767 A
Diffuse neutron scattering in deuterated ice . . . . . 1173 B
Diffusion in zinc oxide nanocrystallites . . . . . 135 L

PAGE
Diffusional creep in a polycrystalline array . . . . . 565 A
Dislocation, threading, model of . . . . . 183 A
Dislocation configurations in TiAl . . . . . 129 A
Dislocation cores, hollow . . . . . 341 A
Dislocation dipoles, fatigue-induced . . . . . 315 A
Dislocation loop in AlPdMn quasicrystal . . . . . 291 L
Dislocation loops in amorphous Si . . . . . 379 A
Dislocation mechanisms in Ni_3Al . . . . . 939 A
Dislocation mobility in ZnS . . . . . 855 A
Dislocation particle interactions . . . . . 1097 A
Dislocation structure in deformed brass . . . . . 1155 A
Dislocations, misfit, topographs from . . . . . 221 A
Dislocations, Peierls–Nabarro model for . . . . . 1085 A
Dislocations and planar faults in solids . . . . . 131 L
Dislocations in AlCuFe quasicrystal . . . . . 309 L
Dislocations in an AlCoNi quasicrystal . . . . . 123 L
Dislocations in anisotropic half-space . . . . . 65 A
Dislocations in Fe and Hf doped NiAl . . . . . 485 A
Dislocations in GaAs/GaAlAs heterostructures . . . . . 779 A
Dislocations in N doped ZnSe/GaAs . . . . . 301 A
Dislocations in Ni_3Al . . . . . 751, 1111 A
Dislocations in NiCo . . . . . 53 L
Dislocations in NiCr . . . . . 31 L
Dislocations in quasicrystals . . . . . 981 A
Dislocations in TiAl . . . . . 285 A
Disordered materials, hopping in . . . . . 577 B
Disordered systems, charge transport in . . . . . 39 B
$D0_{19}$ compounds, deformation of . . . . . 1161 A
Domain configuration in $Au_{11}In_3$ . . . . . 211 L
Ductilization of NiAl . . . . . 507 A
Dumb-bell transport in f.c.c. alloys . . . . . 821 A

Electric fields, high, physics and chemistry in . . . . . 945 B
Electron correlation, fifth-order components . . . . . 1011 B
Electron diffraction, higher-order Laue zone . . . . . 203 A
Electron gas, Coulomb interaction in . . . . . 77 L
Electron gas, 2D, magnetoresistivity of . . . . . 1059 B
Electronegativities, calculation of . . . . . 807 B
Electronegativity and ionization energy . . . . . 821 B
Embedding potentials for structures . . . . . 177 L
Exchange correlation for small atoms . . . . . 1001 B
Exchange potentials, exact and approximate . . . . . 779 B
Excited states, calculation of . . . . . 771, 1067 B

Fatigue-induced dislocation dipoles . . . . . 315 A
F.c.c. alloys, dumb-bell transport in . . . . . 821 A
F.c.c. materials, grain boundaries in . . . . . 471 A
Fe, liquid, electronic properties of . . . . . 697 B
FeAl, hardening and strain-ageing in . . . . . 961 A
Ferroelastic transition in zirconia . . . . . 499 B
Ferroelectric films, hysteresis in . . . . . 461 B
Finite element methods for molecular spectra . . . . . 1027 B
Fluorine formation in calcium fluoride . . . . . 285 L
Foam, structural transformations in . . . . . 99 L
Fractal carbon filaments on insulators . . . . . 45 L
Froths, minimal, Kelvin's conjecture on . . . . . 107, 297 L
Fulminic acid, structure of . . . . . 755 B

	PAGE
GaAs, cathodoluminescence of	553 B
GaAs, doped, barrier switch	1093 B
GaAs, plastic deformation of	741 A
GaAs superlattices, structure of	871 A
GaAs/GaAlAs heterostructures, dislocations in	779 A
GaInP, ordering in	615 A
GeC, hydrogenated	1 B
Ge:H, optoelectronic properties of	387 B
GeSe, short range order in	209 B
Glass, excitations and geometry in	911 B
Glasses, indentation hardness of	1131 A
Gold clusters, spontaneous alloying in	279 L
Grain boundaries in AlN ceramics	525 B
Grain boundaries in f.c.c. materials	471 A
Grain boundaries in intermetallic compounds	409 A
Grain boundaries in stressed polycrystals	327 A
Grain boundaries in YBaCuO	717 A
Grain growth, theory of	841 A
Grain shrinkage in a two-phase system	583 A
Hall coefficient of $LaSrCuO_4$	317 L
Hardnesses, acid and base, calculation of	807 B
H diffusion in deformed Ni_3Fe	1039 A
High electric fields, physics and chemistry in	945 B
High T_c superconductors, transitions in	155 L
Higher-order Laue zone electron diffraction	203 A
Hole-induced annealing in Si:H	327 L
Hollow dislocation cores	341 A
Homogeneous random alloys, displacements in	269 L
Hopping in disordered materials	577 B
Hopping systems, localized carriers in	241 L
Hot solid, vibrational properties of	833 B
Hückel and density functional theories	745 B
Hydrogen dilution in SiC:H	377 B
Hysteresis in ferroelectric films	461 B
Ice, cracking of	9 L
Ice, deuterated, diffuse neutron scattering in	1173 B
Ice, non-basal dislocations in	1 A
Icosahedral alloys, ZnMg-rare earth	351 L
Icosahedral phase in AlMgLi alloys	343 L
Image simulations and stacking fault contrast	19 A
Indentation hardness of glasses	1131 A
InGaAs/GaAs heterostructures, relaxation in	995 A
InP, deformation and stacking faults in	903 A
Interdiffusion in amorphous NiZr	1083 B
Interfaces bonding in semiconductors	941 B
Interfacial dislocations, model for	1097 A
Interionic potentials, theory of	871 B
Intermetallic compounds, grain boundaries in	409 A
Ion implantation in conjugated polymers	1155 B
Ionic conducting SrLi alumina	643 B
Ionization energy and electronegativity	821 B
Ir and Rh, lattice defects in	1183 B
Isomerization of polyacetylene	925 B
Itinerant-electron magnetism	979 B

PAGE
K, liquid, structure of . . . . . 965 B
K, phonons in . . . . . 1197 B
Kelvin's conjecture on minimal surfaces . . . . . 107 L
Kink pairs, trapezoidal, nucleation of . . . . . 805 A

$LaSrCuO_4$, Hall coefficient of . . . . . 317 L
Lattice defects in Ir and Rh . . . . . 1183 B
Lattice models and Q4 theory . . . . . 437 B
Lead niobium oxides, superstructures in . . . . . 633 A
$L1_2$ precipitates in AlLi . . . . . 591 A
Light-induced changes in doped Si:H . . . . . 595 B
Light-induced changes in SiN . . . . . 359 B
Liquid, structure of . . . . . 833 B
Liquid CuAg, resistivity of . . . . . 1075 B
Liquid K, structure of . . . . . 965 B
Liquid–solid transitions in quantal systems . . . . . 957 B
Localized carriers in hopping systems . . . . . 241 L
Loss tangent distribution function . . . . . 1111 B

Magnetic amorphous Co–Gd . . . . . 47 B
Magnetic properties of SmFeGa compounds . . . . . 103 B
Magnetism, itinerant-electron . . . . . 979 B
Magnetoplasma in superlattices . . . . . 471 B
Magnetoresistivity of a 2D electron gas . . . . . 1059 B
Medium-range order in metallic glasses . . . . . 421 A
Metal clusters, photoabsorption of . . . . . 1037 B
Metal–semiconductor transition in CrSiV films . . . . . 237 B
Metallic clusters, structure of . . . . . 1045 B
Metallic glasses, medium-range order in . . . . . 421 A
Metallic glasses, relaxation in . . . . . 491 B
Metals, liquid, electronic properties of . . . . . 697 B
Metastability in doped Si:H . . . . . 291 B
Microcrystalline silicon films, free carriers in . . . . . 197 B
Microstructure of binary alloys . . . . . 83 B
Minimal froths, Kelvin's conjecture on . . . . . 297 L
Minimal surfaces, Kelvin's conjecture on . . . . . 107 L
Misfit dislocations, topographs from . . . . . 221 A
Mode-I crack in nonlinear materials . . . . . 215 L
Modulated crystals, morphology of . . . . . 69 B
Molecular spectra, calculation of . . . . . 1027 B
Momentum distribution, self-interaction in . . . . . 849 B
Morphology of modulated crystals . . . . . 69 B

Nanomachined silicon crystals . . . . . 91 A
Nb_3Al, Cr_3Si and V_3Si, forbidden reflections in . . . . . 23 L
Ni_3Al, dislocation in . . . . . 597, 751, 939, 1111 A
NiAl, ductilization of . . . . . 507 A
NiAl, Fe and Hf doped, dislocations in . . . . . 485 A
$Ni_3(AlHf)B$, stress and deformation of . . . . . 105 A
NiCo, dislocations in . . . . . 53 L
NiCr, dislocations in . . . . . 31 L
Ni_3Fe, deformed, H diffusion in . . . . . 1039 A
NiZr, amorphous, interdiffusion in . . . . . 1083 B
NMR studies of Si:H . . . . . 169 B
Non-basal dislocations in ice . . . . . 1 A
Nonlinear materials, mode-I crack in . . . . . 215 L
Nucleation of crystals in liquids . . . . . 261 L
Nucleation of twins in $BaTiO_3$ ceramics . . . . . 1051 A

	PAGE
Optoelectronic properties of Ge:H	387 B
Order–disorder in YBaCuO	683 B
Ordering in GaInP	615 A
Oxides, *ab-initio* energetics of	879 B
Oxides deposited on Pt/MgO	1101 B
Patterns, cellular, correlations in	397 B
PbSn eutectic, superplastic flow in	1017 A
Pd clusters in MgO, structure of	1073 A
Peierls–Nabarro model	1085 A
Peierls–Nabarro model, critical stress in	171 L
Penrose tiling, two-colour	93 L
Perturbation expansions in D dimensions	787 B
Phasons in quasicrystals	71 L
Phonons in K	1197 B
Photoabsorption of metal clusters	1037 B
Photocurrents, space-charge-limited	277 B
Photoinduced defects in a-Si:H	121 B
Photoluminescence in amorphous Si	609 B
Photostructural changes in As chalcogenides	21 B
Photothermal deflection studies of Si:H	335 B
Planar faults and dislocations in solids	131 L
Planar faults in Ti_2AlNb-type alloys	701 A
Planar interfaces between stressed materials	61 L
Plasmons and screening in crystals	901 B
Plastic deformation of GaAs	741 A
Plastic relaxation in InGaAs/GaAs	995 A
Plastically deformed polycrystals, stress in	437 A
Platinum particles, sulphided	655 B
Point defects in BiTe chalcogenides	31 B
Poisson–Boltzmann theory, modified	1051 B
Poisson–Voronoi tesselation	431 B
Polishing diamond, mechanisms in	621 B
Polyacetylene, isomerization of	925 B
Polycrystalline array, diffusional creep in	565 A
Polycrystals, plastically deformed, stress in	437 A
Polyethylene, size effects in	267 A
Polymers, conjugated, ion implantation in	1155 B
Polymorphic transformations in titania	1 L
Polytypic deformation in SiC	451 A
Potentials, embedding, for structures	177 L
Probability functions, size distribution	159 L
Pt/MgO, oxides deposited on	1101 B
Quantal systems, transitions in	957 B
Quasicrystal decomposition of AlFe	205 L
Quasicrystalline AlFe alloys	45 A
Quasicrystalline AlNiCo, order–disorder in	227 L
Quasicrystalline phase formation of AlNiFe	141 L
Quasicrystals, dislocations in	981 A
Quasicrystals, phasons in	71 L
Relaxation in metallic glasses	491 B
Screening and plasmons in crystals	901 B
Self-interaction in momentum distribution	849 B
Semiconductor interfaces, bonding at	941 B
Semiconductor–metal–oxide structure	235 L
Semiconductors, deformation of	793 A

PAGE

Shear constants, calculation of . . . . . 889 B
Shift lattice, two-dimensional . . . . . 151 A
Short-range order in GeSe . . . . . 209 B
Si, amorphous, dislocation loops in . . . . . 379 A
Si, amorphous, photoluminescence in . . . . . 609 B
Si, amorphous, transport properties of . . . . . 349 B
Si multilayers, B doped . . . . . 255 A
Si transistor, amorphous, electron states in . . . . . 223 B
Si transistors, amorphous, stress in . . . . . 327 B
Si:H, band edge mobility in . . . . . 253 B
Si:H, crystallization of . . . . . 509 B
Si:H, dangling-bond defects in . . . . . 263 B
Si:H, doped, light-induced changes in . . . . . 595 B
Si:H, doped, metastability in . . . . . 291 B
Si:H, hole-induced annealing in . . . . . 327 L
Si:H, NMR studies of . . . . . 169 B
Si:H, photoinduced defects in . . . . . 121 B
Si:H, photothermal deflection studies of . . . . . 335 B
Si:H, trapping and recombination in . . . . . 147 B
SiC, irradiated, defects in . . . . . 237 A
SiC, polytypic deformation in . . . . . 451 A
SiC:H, hydrogen dilution in . . . . . 377 B
Silicon, amorphous, dangling bonds in . . . . . 57 B
Silicon, amorphous, structural changes in . . . . . 177 B
Silicon, amorphous, thermopower of . . . . . 159 B
Silicon, D defects and strain fields in . . . . . 1179 A
Silicon, hydrogen implanted, defects in . . . . . 881 A
Silicon, tilt grain boundary in . . . . . 185 L
Silicon crystals, nanomachined . . . . . 91 A
Silicon microcrystalline films, free carriers in . . . . . 197 B
Silver, structure and thermal stability of . . . . . 551 A
SiN, defects and hydrogen in . . . . . 307 B
SiN, light-induced changes in . . . . . 359 B
Size-distribution probability functions . . . . . 159 L
Size effects in high-strength polyethylene . . . . . 267 A
Small atoms, exchange-correlation for . . . . . 1001 B
SmFeGa compounds, magnetic properties of . . . . . 103 B
Soft-X-ray threshold of alkali metals . . . . . 993 B
Solid solutions, correlated percolation in . . . . . 95 B
Space-charge-limited photocurrents . . . . . 277 B
Spin orbitals for excited states, calculation of . . . . . 1067 B
Spinodal ordering in AuCu . . . . . 925 A
Spinodal wave in CuMnAl . . . . . 349 A
SrLi alumina, ionic conducting . . . . . 643 B
$SrRuO_3$/YBaCuO heterostructures . . . . . 253 L
Stacking fault contrast and image simulations . . . . . 19 A
Stacking faults in YBaCuO . . . . . 729 A
Strain deformation in CuW . . . . . 645 A
Stress and deformation in $Ni_3(AlHf)B$ . . . . . 105 A
Stress in amorphous Si transistors . . . . . 327 B
Stressed materials, planar interfaces in . . . . . 61 L
Structural transformations in foam . . . . . 99 L
Sulphided platinum particles . . . . . 655 B
Superconducting energy gap in YBaCuO . . . . . 147 L
Superconductivity, theory of . . . . . 859 B
Superconductors, high T_c, transitions in . . . . . 155 L
Superdislocation networks in Ni_3Al . . . . . 597 A
Superionic UO_2, simulation of . . . . . 535 B

	PAGE
Superlattices, GaAs, structure of	871 A
Superlattices, magnetoplasma in	471 B
Superplastic flow in PbSn eutectic	1017 A
Superstructures in lead niobium oxides	633 A
Surfaces chemisorption	931 B
Tesselation, Poisson–Voronoi	431 B
Tetrapod ZnO, model of	1125 A
Thermal stability and structure of silver	551 A
Thermopower of amorphous silicon	159 B
Threading dislocation, model of	183 A
TiAl, deformation at high T	689 A
TiAl, dislocations in	129, 285 A
TiAl, structure and deformation of	527 A
TiAl, twin interfaces in	197 L
Ti_2AlNb-type alloys, planar faults in	701 A
Tilt grain boundary in silicon	185 L
Titania, polymorphic transformations in	1 L
Transients in antiphase coarsening	247 L
Transport properties of amorphous Si	349 B
Trapezoidal kink pairs, nucleation of	805 A
Triple junction, r^{-n} singular fields at	223 L
Twin interfaces in TiAl	197 L
Twin intersection model	111 L
Two-colour Penrose tiling	93 L
Two-dimensional shift lattice	151 A
Two-phase system, grain shrinkage in	583 A
UO_2, superionic, simulation of	535 B
UPt_3, critical field anisotropy in	319 L
V_3Si, Cr_3Si and Nb_3Al, forbidden reflections in	23 L
Vacancies in Cu_3Au	11 A
Vacancies in FeAl	961 A
Vacancy diffusion, creep equations for	37 L
Voidites in IaB diamonds	767 A
YBaCuO, doped, structural modulation in	397 A
YBaCuO, grain boundaries in	717 A
YBaCuO, order–disorder in	683 B
YBaCuO, stacking faults in	729 A
YBaCuO, superconducting energy gap in	147 L
YBaCuO/$SrRuO_3$ heterostructures	253 L
Yield and flow stress of polycrystals	327 A
Zinc oxide nanocrystallites, diffusion in	135 L
Zirconia, ferroelastic transition in	499 B
ZnMg–rare earth alloys, structure of	351 L
ZnO, tetrapod, model of	1125 A
ZnS, dislocation mobility in	855 A
ZnSe/GaAs, N doped, dislocations in	301 A
Zr, compression twins in	189 L
